

# Ideas for papers

Roberto Aguiar Lima

October 22, 2014

## 1 Ideas

These are my ideias for new papers:

- Building a CMAC hash using hyperplanes
- Motus framework for building CMAC based systems
- Implementing a CMAC based system
- Controlling a transtibialis active prosthesis using a CMAC
- Controlling a transtibialis active prosthesis using a MLP
- ANN architecture for controlling active prosthesis using Motus
- Choosing Input parameters for an ANN transtibialis active prosthesis
- Algorithm Otimization Based Methodology for Scientific Programs
