Ideas for papers

Roberto Aguiar Lima

October 22, 2014

1 Ideas

These are my ideias for new papers:
Building a CMAC hash using hyperplanes
Motus framework for building CMAC based systems
Implementing a CMAC based system
Controling a transtibialis active prosthesis using a CMAC
Controling a transtibialis active prosthesis using a MLP
ANN architecture for controling active prosthesis using Motus
Choosing Input parameters for an ANN transtibialis active prosthesis
Algorithm Otimization Based Methodology for Scientfic Programs
